

# NSPR SERIES

## No Swage Conveyor Rollers

Looking for a roller with high strength or perhaps under tension?  
Look no further than our **NSPR SERIES**...

Designed with precision in mind, these rollers are made from Cold Drawn Seamless tube, fitted with integral deep groove precision bearings (which where possible will be covered with a plastic cap and/or seal) & captivated axle finished to your choice.

The precise tube concentricity allows these rollers to handle conveyor speeds of up to 2 m/s. Rollers from the NSPR series are a highly durable choice.

**-5<120°C**
