

# RGM1200 SERIES

## Gravity+ Conveyor Rollers

The **RGM1200 SERIES** combines all the elements of a free-spinning roller, but with greater load capacity in mind.

These rollers consist of a mild steel tube finished with BZP as standard, mild steel axle and greased bearings encased in a metal housing to from atmospheric dust.

The RGM1200 Series' most prominent use has been for both metal & wood cutting saw feed conveyors, but they can be used under-belt too! A diverse, good all-round, general-purpose roller.

0<80 °C
